

Thank you for choosing the Smart-bolt

This guide will assist in using the features and functions of the lock. Please download the app from the app store or Google play or scan QR code found on next page.

01 Initial Status

Pressing the unlock icon or scanning an RFID card will unlock the door.

02 Reset Lock

Press the C button for 3 seconds, then press lock icon for 6 times then press unlock icon for 1 time.

03 Indicators

	Operate successfully	- buzzer long beeps - green LED stays for 2 seconds
	Operate unsuccessfully	- buzzer beeps 2 times - red LED flashes 2 times
	Repeated registration	- buzzer beeps 2 times - red LED stays for 2 seconds
	Full capacity alert	- buzzer beeps 2 times - red LED stays for 10 seconds
	Low battery alert	- buzzer beeps 5 times - red LED flashes 5 seconds
	Improper attempts alert	- buzzer beeps 10 times - red LED flashes 10 seconds - system freezes for 3 minutes

Notes

Remove the battery cover, you will find the button S, button C. S button is for setting, C button is for deletion or reset lock

Each operation should be done within 5 seconds, or it will exit the operation.

04 Programming to right Hand Opening Doors

The Smart-bolt is suitable for left hand or right hand opening doors. As a default, it is set as a left hand. If you have a right hand opening door, please adjust the direction of the door to correct the open and locked icons.

- Press the S button for 3 seconds.
- Input admin code and press unlock button. If the lock didn't connect to the APP or unregistered any admin by manual, you don't need to do this operation.
- Press "91".
- Press unlock icon.
- Motor will change direction to fit with the door direction.

Repeating these steps will return the lock to the original direction.

05 Download and Install the app

Enable your smart phone to scan QR code below to download App. You can also search for "Ekey lock" on App store or Google play to download the App.

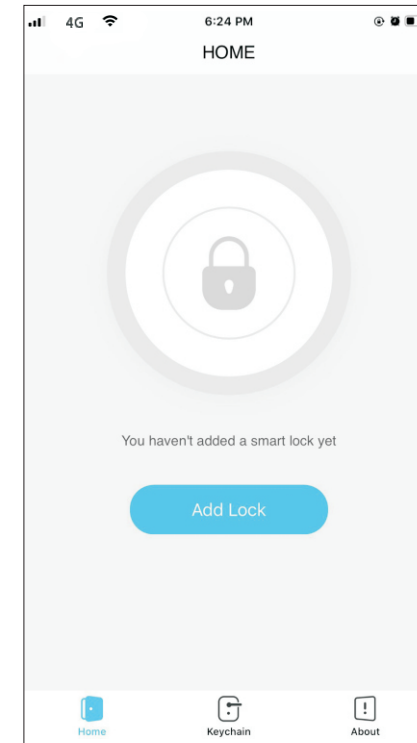

iOS App Store

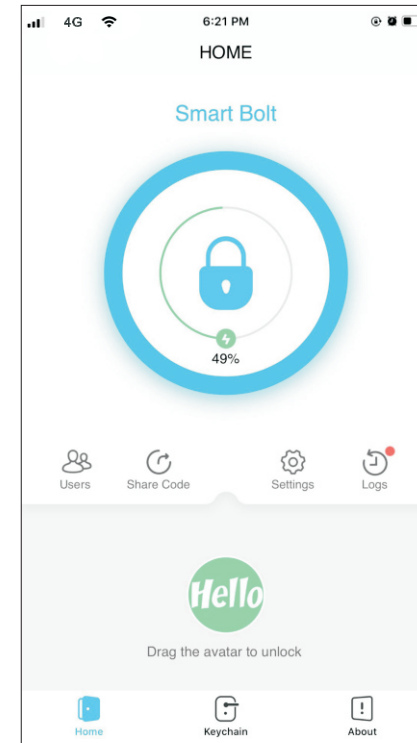

Google Play

06 Connect your smart-bolt to App

To connect

Click "Add lock" and follow the app...

Connected

Now you can drag the avatar to unlock

Notes

- You can add other smart locks at "Keychain"
- The user, set directly on the lock not by app, will be named as Lock user on the app.

07 Share codes from anywhere

You can also disable the shared code after sharing, or enable it again after disabling it. To do it, you have to close to the lock. There are three different kinds of sharing codes for different purposes.

One Time Code (OTC)

You can share an OTC to visitors or delivery.

The code has one time access within 3 days after activation. You can set OTC activation date.

Timed code

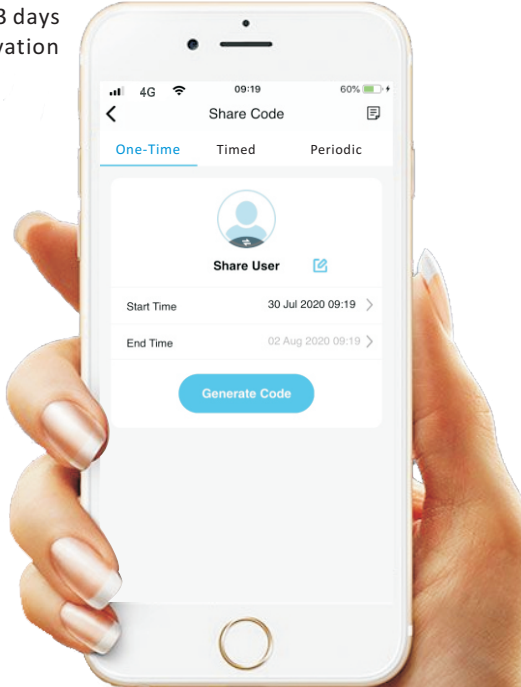

You can share timed code to your friends, guests, baby sitter or Airbnb tenants for scheduled access.

The code has unlimited access during the scheduled time. After the time passes, the code will be invalid.

Periodic code

You can share periodic code to hour maid for scheduled access.

Periodic code can be set to be valid at a fixed time every day, but invalid at other times. For example, a code is valid only from 4:00pm to 6:00pm each day.

08 Advance Setting

Phone List

All the phone connected to the smart lock will be listed here.

Auto Lock Timer

Activate this function, lock will re-lock automatically after unlocking. You can configure the timer or disable it here.

Mute Mode

It will mute the keypad buzzer at mute mode. But it still has buzzer beep when setting or alert.

Auto-Authorize

To create a new app user, with Auto-Authorize ON, you only need scan the QR code. App will create a code. It's easier but less security. Anybody who can scan the QR code will add themselves to be a new user.

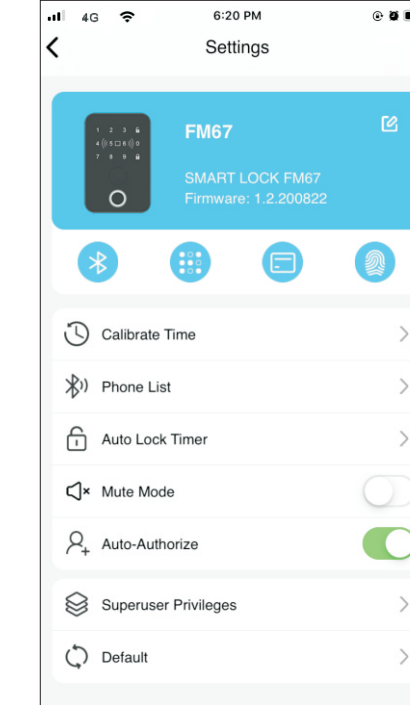

When it is OFF, you need first scan the QR code, then input an authorized code from admin or superuser. It is more security. You can switch it off after you add necessary users.

Superuser Privileges

You can assign different rights to users.

Default

You can reset the lock to be factory setting.

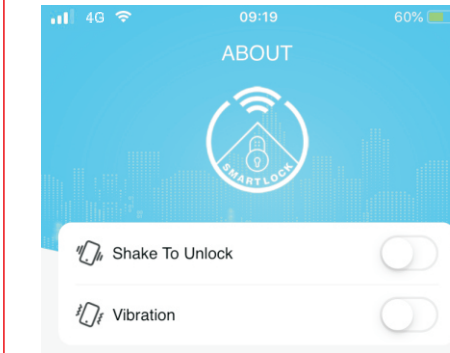

09 More Functions

Shake To Unlock

Enable "Shake to unlock", you can unlock the door by shaking the phone. You need close to smart bolt and open the APP.

Vibration

If you enable the vibration, when you unlock smart bolt, your phone will vibrate one time. Make sure your phone setting of vibration is also on.

10 Scramble pin code function to anti-peep

Users may enter any random digits before or/and after the correct password and can still gain access, make sure strangers can't steal your password by watching you nearby when you enter the password.

For example: if the correct password is 123123, the random password can be 5412312378, 1231237888, 3556123123, etc.

11

Always open Mode

This stops the door from locking and puts it into passage mode. Useful when gardening, bringing groceries in from the car etc.

After a successful unlock performance, press “1”key, then press unlock icon within 5 seconds, activate Always-Open Mode. The mode will keep the door unlocked, green LED flashes once each 5 seconds.

Press the lock icon to deactivate Always-Open Mode. The lock will be back to normal work state.

12

Manage lock user access without APP

Create NEW Access

Add administrator (1 only):

S

>

0

>

>

a. Press the S button for 3 seconds.

b. Press “0”.

c. Input 4-12 digits access code.

d. Press unlock icon, a long beep and green symbol means the admin has been added. You can change the admin code on the App.

Add a new user with an access code(99 at most):

S

>

Admin Code

>

1

>

>

a. Press the S button for 3 seconds.

b. Input admin code and press unlock button, if it was registered.

c. Press”1”, input 4-12 digits user code.

d. Press unlock icon, a long beep and green symbol means the new code has been added.

e. You can continually add another code within 5 seconds, or two short beeps and two red LED flashes to end the setting.

Add a new user with an RFID card (200 at most):

S

>

Admin Code

>

2

>

a. Press the S button for 3 seconds.

b. Input admin code and press unlock button, if it was registered.

c. Press”2”, swipe the card, a beep and green symbol means the card has been added.

d. You can continually add another card within 5 seconds, or two short beeps and two red LED flashes to end the setting.

Add a new user with a Fingerprint (100 at most):

S

>

Admin Code

>

3

>

a. Press the S button for 3 seconds.

b. Input admin code and press unlock button, if it was registered.

c. Press”3”, put any finger on the sensor area then remove it when you hear a short beep; Place the same area of the finger on the sensor again, then remove it when you hear a short beep; Repeat it again. A longer beep and green LED indicate that the fingerprint has been added.

The sensor needs to capture 3 times the same area of the finger. If there is no long beep and green LED after 3 inputs, it means that the sensor does not capture the same area of the finger, you need to continue to put down your finger on the sensor area until the long beep and the green LED light up.

d. After successfully adding a fingerprint, you can continue to add another fingerprint within 5 seconds, or two short beeps and two red LED flashes to end the setting.
